www.superiorpeat.com
Over 20 years of experience by leading orchardists and vineyardists, and confirmed by the Summerland Agriculture Research Centre, has proven that Superior Peat, when used in replanting, reduces the effect of replant disease without fumigating. Significant increase in first-year root and leaf growth is achieved using Superior Peat, whether it be apples, peaches, pears, cherries or grapes. It is a natural way to adjust soil pH and add moisture-holding organic material at the root level. Available in Canada and the United States. Bulk suppliers of organic soil amend-ments and conditioners.
